PROFESSIONAL EXPERIENCE

IT Support Volunteer | *NetSoc (Networking & IT Society), Ontario Tech* **Nov. 2021 – Jan. 2026**

- ◇ **Provided** Tier 1–2 technical support for networking and cybersecurity labs, diagnosing and resolving 100+ hardware, software, connectivity, and configuration issues across Windows and Linux environments for students and peers.
- ◇ **Troubleshoot** account access, virtual machine, and network configuration issues (TCP/IP, DNS, VPN connectivity), documenting recurring problems and fixes to speed up future resolutions.
- ◇ **Onboarded** and coached new members on lab infrastructure, account setup, and core troubleshooting workflows.

Customer Service Representative | *Sobeys* **Nov. 2022 – Present**

- ◇ **Resolved** complex customer inquiries and de-escalated conflicts daily, providing first-line troubleshooting of point-of-sale (POS) issues in a fast-paced retail environment.

Penetration Testing Intern | *Riipen* **Sep. 2024 – Dec. 2024**

- ◇ **Conducted** security assessments across 5 domains using Burp Suite, OWASP ZAP, and Nmap, delivering a structured, client-facing report with OWASP Top 10–aligned remediation steps.
- ◇ **Identified** and documented a critical session-security vulnerability, communicating findings clearly enough to prompt immediate confirmation and scheduled remediation by the client's engineering team.

TECHNICAL PROJECTS

Self-Hosted IT Service Desk Lab | Documentation

- ◇ **Deployed** a containerized Peppermint ticketing system with Docker on a hardened Ubuntu cloud server (Linode), simulating end-to-end ticket intake, triage, and resolution workflows; published full build documentation.

Enterprise Systems Administration (Active Directory & Windows Server)

- ◇ **Administered** an AD DS and Windows Server environment across a multi-site network: created user accounts, Organizational Units (OUs), and role-based security groups, and managed password resets, password complexity, and account lockout policies via GPO.
- ◇ **Configured** DNS, DHCP, and a Distributed File System (DFS) for resilient file access and reliable name resolution across the network.

Enterprise Network Security (pfSense)

- ◇ **Designed** a multi-zone network (LAN, DMZ, WAN) on pfSense with OpenVPN remote access (split tunneling, internal PKI), HAProxy load balancing, and Ubuntu web servers hardened with custom iptables rules.

EDUCATION

Bachelor of Information Technology (Honours) – Networking and IT Security **Jan. 2026**
Ontario Tech University

CERTIFICATIONS

Blue Team Level 1 (BTL1) | *Security Blue Team* **Sep. 2025**

TECHNICAL SKILLS

Support & Ticketing: Tier 1/2 Troubleshooting (Desktops, Laptops, Peripherals, Printers), Ticketing Systems (Peppermint), Incident Documentation, Knowledge-Base Writing, User Onboarding/Offboarding

Systems: Windows 10/11, Windows Server, Active Directory (Account Creation, Password Resets, Account Lockouts, Groups/OUs), Group Policy (GPO), Microsoft 365, Linux (CLI), VMware, Event Viewer, Sysinternals

Networking: TCP/IP, DNS, DHCP, VPN Setup & Connectivity Troubleshooting, Wireshark

Scripting & Remote Tools: PowerShell, Bash, Remote Desktop (RDP)
